

Canopy Software, Inc. is where passionate and creative people collaborate to build amazing digital experiences while delivering world-class service. Over the years, Canopy Software has transformed custom programming projects into full-fledged profitable business endeavors. Three premier companies formed as an offshoot of Canopy Software:

- Mediation Case Manager administers large-scale mediation programs typically implemented after a natural or economic disaster to help get people back on their feet. We help resolve disputes quickly by the thousands by providing administrative services along with quality software.
- ManageMyTests, LLC offers certification programs a comprehensive exam management platform that incorporates cutting edge technology. Customers can manage item banks, create tests, score, analyze, notify, and report with ease.
- UnderStory, LLC is a brand and digital design studio blending art, technology and commerce to tell a brand's story using unique creative experiences. From web platforms and products to brand identities and systems, UnderStory works with clients to bring their stories to life.

Founded in 1992, VR provides elections technology and services to enable our customers to hold a successful election, every time. We have more than 20 years' experience working in the Florida elections community. Today VR Systems serves elections clients in states around the US and 64 of 67 counties within Florida. The company, headquartered in Tallahassee, Florida, with a regional office in Matthews, North Carolina, is 100 percent employee owned (ESOP) by its approximately 40 employees. VR's suite of products and services include the EViD electronic poll book, the Voter Focus elections management solution, VR Tower web services and ELM online election worker training. Our elections software reaches all the way from the back office database to the public facing webpages. We use the right tools to ensure our customers have the software they need to run successful elections. With continual legislative and technological changes, we're always challenged to be nimble and innovative.
